

## **Preventative Maintenance Program**

EEV's Service Department has developed a preventive maintenance program to ensure that your ambulance stays in top operational condition. Our factory certified service technicians will perform the following module maintenance procedures:

1. Remove panels from all exterior compartments and entry doors as needed.
2. Clean and lubricate all necessary door latches and handles, adjusting latch timing.
3. Install door panels with epoxy coated torx head screws to ensure door panels stay attached and tight.
4. Inspect all entry and compartment door weather strip.
5. Inspect ambulance electrical system, including the following procedures:
  - Ensure proper function of all strobes and emergency flashers.
  - Check light bars for proper operation.
  - Inspect on board inverter/battery charger function.
  - Inspect all connections in power distribution.
  - Inspect all connections in electrical dead space.
  - Check open door indicator circuits and compartment lights.
  - Inspect and clean all battery cable lugs.
  - Check proper function of ammeters and voltmeters.
  - Check function of 110 volt and 12-volt outlets.
  - Check brake, tail, and turn signal functions.
  - Check operation of all marker lights.
  - Check temperature output on rear heat/cool unit.
  - Ensure proper function of siren and siren speakers
  - Check any additional functions on front and rear switch panel.
